AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This is in response to the Office Action mailed August 27, 2002. Please amend the application as follows:

In the Specification

Please amend the Specification as shown below in clean form and as shown in marked form on the attached document entitled "Marked Copy of November 2002 Amendment to the Specification in USSN 09/841,380 (56433US002)":

At page 10, lines 20 – 29:

The presence of low caliper regions can be further discouraged and the cross-web uniformity of the coating on the transfer surface and target substrate can be further improved by changing the drop pattern position with respect to the rotating transfer surface during spraying using, for example, mechanical motion or vibration of the electrostatic spray head or heads as in U.S. Patent Nos. 2,733,171, 2,893,894 and
